TransCelerate DDF Project Notes

1. Project Overview

- **Project Goals:** Systematically explore TransCelerate DDF repositories to adapt them for commercial use
- **Timeline:** Part-time project spanning multiple weeks

- **Repositories:**
 - ddf-home: Documentation and website content
 - ddf-sdr-api: .NET 6 Web API for study definitions
 - ddf-sdr-ui: Angular-based user interface
 - ddf-sdr-platform: Terraform IaC for Azure deployment
 - ddf-directory: Directory of DDF-compatible solutions
 - ddf-sdr-support: Support repository

2. System Architecture

- High-level architecture diagram (to be added)
- Component relationships (to be documented)
- Data flow diagrams (to be created)
- Integration points (to be identified)

3. Repository Analysis

3.1 ddf-home

- **Purpose:** Houses content for Digital Data Flow Website pages including community information, contributor license agreement, and links to related content
- **Key Components:**
- **Documentation Insights:**
- **Commercial Adaptation Considerations:**

3.2 ddf-sdr-api

- **Architecture:** .NET 6 Web API project
- **API Endpoints:**
- **Data Models:**
- **Authentication & Security:**
- **Dependencies:**
- **Commercial Adaptation Considerations:**

3.4 ddf-sdr-platform

- **Infrastructure Components:**
- **Deployment Process:**
- **Security Configurations:**
- **Scaling Considerations:**
- **Cost Analysis:**
- **Commercial Adaptation Considerations:**

3.4 ddf-sdr-platform

- **Infrastructure Components:**
- **Deployment Process:**
- **Security Configurations:**
- **Scaling Considerations:**
- **Cost Analysis:**
- **Commercial Adaptation Considerations:**

3.5 ddf-directory

- **Purpose:** Directory of DDF-compatible solutions from various vendors
- **Integration:**
- **Commercial Adaptation Considerations:**

3.3 ddf-sdr-ui

- **UI Architecture:** Angular-based application
- **User Flows:**
- **State Management:**
- **API Integration:**
- **Customization Points:**
- **Commercial Adaptation Considerations:**

3.6 ddf-sdr-support

- **Support Processes:**
- **Common Issues:**
- **Commercial Support Requirements:**

4. USDM Data Model Analysis

- **Core Concepts:** Unified Study Definitions Model
- **Entities & Relationships:**
- **Version Compatibility:**
- **Extension Points:**

5. Commercial Adaptation Plan

- **Licensing Considerations:**
- **Branding & Customization:**
- **Feature Enhancements:**
- **Integration Requirements:**
- **Deployment Strategy:**

6. Implementation Roadmap

- **Phase 1:** Architecture Understanding
- **Phase 2:** Technical Assessment
- **Phase 3:** Commercial Adaptation Planning
- **Phase 4:** Implementation Strategy

7. Session Notes

[2025-04-06] - Initial Project Setup

- Created PROJECT_NOTES.md structure
- Reviewed README files from all repositories
- Initial understanding of system purpose and components

8. Open Questions and Action Items

- ☐ Set up local development environment for testing
- ☐ Create initial system architecture diagrams
- ☐ Understand USDM data model in detail
- ☐ Identify Azure-specific dependencies
- ☐ Review licensing implications for commercial use

Progress Tracker

Repository	Initial Review	Architecture Analysis	Code Review	Commercial Assessment	Status
ddf-home	2025-04-06				In Progress
ddf-sdr-api	2025-04-06				In Progress
ddf-sdr-ui	2025-04-06				In Progress
ddf-sdr-platform	2025-04-06				In Progress
ddf-directory	2025-04-06				In Progress
ddf-sdr-support	2025-04-06				In Progress

Repository Exploration Templates

Session Template

\n## [Repository Name] Exploration - [Date]

Session Goals

- Goal 1
- Goal 2

Key Findings

- Finding 1
- Finding 2

Code Structure Insights

- Key files and their purpose
- Design patterns identified
- Notable implementation details

Dependencies

- External libraries and frameworks
- Integration points with other repositories
- Environment requirements

Commercial Adaptation Considerations

- Licensing implications
- Customization opportunities
- Potential challenges

Open Questions

- Question 1
- Question 2

Next Steps

- Task 1
- Task 2 \n
